
DEFENCE MANAGEMENT DEPARTMENT

Aim and Scope

The M.A. program in Defence Resources Management offered under the Defence Management Department of the Institute has been designed to educate military or civilian experts who have the necessary scientific and technical knowledge needed in the fields of administration, strategy, logistics, and resource management by the firms and enterprises in the defence sector and mainly by the Ministry of National Defence and its subordinate force commands. Combining the subjects related to the defence sector within the disciplines of administration, economics, and industrial engineering, the department constantly updates the program by taking the needs of the national defence sector and the developments in global defence resources management into account.

Career Opportunities

The program aims to provide experts who have the scientific and technical knowledge to work in the Ministry of National Defence or the institutions and enterprises within the defence sector. Our graduates may continue their academic careers as research assistants in the business, economics, public administration, and finance departments of institutes or war colleges of the Turkish National Defence University or as students in Ph.D. programs in these departments.
